

# Sun Microsystems continues to bring value to the entire Education Community!

MG Program runs from 16 October 2008 until 20 December 2008 and in Europe, Middle East and Africa only

Sun Microsystems is committed to helping educators use and adapt technology through our strategic programs, creating strong partnerships with Higher Education institutions. An example of this commitment, is our **Matching Grant Program** currently on offer to you. Based on Buy 1 - Get 1 Free basis, special savings are offered to academic and research labs on selected Sun products. This program runs from now until 20 DECEMBER 2008. All equipment on the order must be part of a classroom, a student, or a research lab configuration, for student, faculty, or research desktops. Matching grants are subject to Sun's approval according to the conditions of the program (see the customer guidelines on page 6). In the product list below, you can find more information per product group by clicking on the hyperlinks. Should you wish to submit a Matching Grant Request, please contact your local Sun Sales Rep, Sun reseller or send an email to [mg09-emea@sun.com](mailto:mg09-emea@sun.com)

Sun Fire

## PRODUCTS AVAILABLE IN THE MATCHING GRANT PROGRAM

<b>** Options can only be bought in MG, when bought with a Sun Server or a Sun Workstation on the MG09 Product List</b>		

## Sun Microsystems continues to bring value to the entire Education Community!

### → MATCHING GRANT '09 PROGRAM ←

#### Customer Guidelines and Process

From 16 OCTOBER 2008 till 20 DECEMBER 2008

\* Every application is subject to final approval by Sun Microsystems, Inc. The number of systems included may be limited due to the response to this matching grant program as there is a limited amount of equipment available for this program.

**Orders will be processed on a first-come first-served basis.** Your order will be considered approved when you receive an approval number from the Sun Program Manager, and if placed within 30 days after the approval date .

\* Eligible hardware for this match is listed in the MG09 End-User Product List.

**All equipment on the order must be part of a classroom, a student or research lab configuration, for student, faculty, or research desktops.**

**Details on the kind of student classroom or research lab must be specified under Question 2 in the MG09 Request Form.**

\* The match will be a 1:1 (buy one, get one "free") match off of list price on the products listed in the MG09 Product List.

Exception for Sun Storage Systems:

If a customer buys a minimum of 2 servers ( buy one, get one free ) or 10 workstations through the MG09 Program, he/she can, in the same order, buy 1 or more Sun Storage systems from the MG09 Product List at MG conditions, i.e. at 50% discount. The storage system has to be part of the quote for which MG Approval is requested.

\* Sun reserves the right to **change the MG09 Product List, to amend or modify the Matching Grant program or to terminate the entire Matching Grant program or withdraw any component of the same detailed herein at any time** during the MG Period. This means, amongst other things, that products can be taken off or added on, and price changes will be applied in the course of the program. Products can only be offered as Matching Grant to a customer, as long as they appear on the MG09 End-User Product List and at the price as indicated on this Product List.

\* **Quotes are valid 30 days after quote date, and Sun Matching Grant Approval Numbers remain valid until 30 days after the approval date.**

After that date, the customer can only order the products at Matching Grant conditions if the Matching Grant Program is still active and if the respective products are still on the Matching Grant Product list.

\* Also note that Options (Disks, Country Kits, Memory, Monitors...) on the MG09 Product List can only be bought with Matching Grant if bought in combination with a Sun Desktop from the MG09 Product List. And for every SunRay 2 or 2FS bought with Matching Grant, the customer needs to buy a Sun Monitor from the MG09 Product List.

\* **Not** included in the match are orders already placed or shipped, items on "promo" and equipment used for administrative computing, infrastructure, or personal use.

\* Submissions which do not follow the process outlined will not qualify for this matching grant.

\* This matching grant is available from **now until December 20, 2008**. This means that requests can be approved until December 20, 2008 and all purchase orders with a valid approval number must arrive at Sun **on or before January 20, 2009 (i.e. 30 days after approval date)**

#### PROCESS CHECKLIST

\* Contact your Sun Sales or Sun Partner Rep and work with him/her on a configuration and **fill out the MG09 Request Form.**

\* Once you have agreed to the configuration and quote, your rep will submit your request and quote for evaluation and possible approval.

\* If the match is approved, your rep will receive an approval number via email and forward to you, with cc to the Partner Rep, if a Partner is involved.

\* The quote number and approval number must be on your purchase order.

\* Cut purchase order within 30 days after the approval date and submit to Sun or Partner as usual.

**! MG REQUESTS RECEIVED AT SUN NO LATER THAN DECEMBER 20, 2008 !**

**! MG ORDERS RECEIVED AT SUN NO LATER THAN JANUARY 20, 2009 !**
